Revolutionising Wireless Data Logging

Tired of downtime and hefty calibration costs?

EL-IOT
With Smart Probes

Introducing EL-IOT with smart probes, the game-changing innovation that sets our wireless automated logging system apart.

Launching soon:

- CO
- Temp and RH
- Temp and RH high accuracy
- Thermocouple

More models coming throughout 2024.

Seamless Calibration

No need to send the entire device back, swap out your probe for a pre-calibrated smart probe for instant calibration, minimising downtime and saving on expenses.

Continuous Operation

Your data logger remains in situation. Data collection never stops, ensuring continuous insights.

Low Maintenance

Say goodbye to manual readings, all data from the device is automatically uploaded to the EasyLog Cloud for remote monitoring.

Automated Alerts

Receive instant alarm notifications when key metrics stray from ideal ranges, allowing proactive intervention and preventing costly issues.
